

Kate Aiello Design

How long in business?

3 years!

Primary business/service offered?

Home and garden design.

What makes your business special?

I've been a design consultant for 30 years. I spent most of my professional time in Kennebunk managing my graphic design studio. I spent my personal time remodeling, restoring homes and gardens. I began getting requests for styling jobs 3 years ago and it has grown ever since. I absolutely love this industry and helping people deepen their love for their own homes. I'm so glad to be a part of it!

Best thing you sell/serve/do?

I approach every project like a Graphic Designer. I use "concepting" to hone my vision for a project, resulting in a unique and personal look for every client. I pride myself in intelligent editing, thoughtful color use and personal touches being the hallmark of my work for any project. Those principles are the consistent theme of my work in every design.

Something people don't realize about your business?

Nothing makes me happier than a client who embraces the whole design process. A client who builds on their confidence and creativity during their time with me. Collaboration isn't necessary, but it is always welcome.
