

SPOTLIGHT

a weekly feature of the Kennebunk-Kennebunkport-Arundel Chamber of Commerce

Coastal Construction and Design

Owner?

Chris Friedlund, General Contractor

Diana Friedlund, Lead Designer

How long in business?

More than ten years!

Primary business/service offered?

We offer residential construction and interior design service for new construction homes or large scale renovations. We also offer remote design services or "quick-service" decorating.

What makes your business special?

We are a husband-wife duo! We customize all of our services to the needs of our client. Our projects are never "cookie cutter" and always have a custom flare. Having a home builder and designer under one roof keeps the building process efficient and effective. We believe that the best design solutions can only be realized when design and construction goes hand-in-hand.

Best thing you sell/serve/do?

We specialize in making high end style and design choices accessible for all. We keep the most important materials of a home classic and add character in areas that can be changed down the road.

Something people don't realize about your business?

Most construction companies only source materials from a handful of vendors, leaving the client with few options for their home's finishes. Through thoughtful communication with our clients, we try to make their ultimate wishes come true by working with dozens of different vendors, opening the door of possibilities.
