

Green Clean Innovations

Owner?

Kelly Strum

How long in business?

2 years!

Primary business/service offered?

Residential and commercial cleaning services.

What makes your business special?

We are the only cleaning company that offers the integration of 100% Green Seal Certified and EPA-Registered anti-viral cleaning. Also on the EPA's N list to fight all Covid variants!

Best thing you sell/serve/do?

We take care of homes and offices as though they are our own! We are very selective with whom we hire to ensure a high caliber service.

Something people don't realize about your business/services?

This company was started by a single mother with a child that had multiple health issues. In her quest to survive and provide the healthiest environment for her son, she came across a miracle cleaning formula that would do just that! It then became her mission to spread the health into her community.

One goal behind our company is to help give opportunities to women that are trying to live independently. We are also working to scale in order to become a company that can give back to our community and donate to the charitable causes we feel passionate about.

While some cleaning companies are just your regular run of the mill trying to make a buck, Green Clean Innovations has a mission with passion and purpose!
