

# SPOTLIGHT

a weekly feature of the Kennebunk-Kennebunkport-Arundel Chamber of Commerce

## Owner?

Chris Williamson

## How long in business?

3 years!

## Primary business/service offered?

Vegetable garden design and installation, accessory structure construction, DIY project support, and off-grid solar electric generator system design.

## What makes your business special?

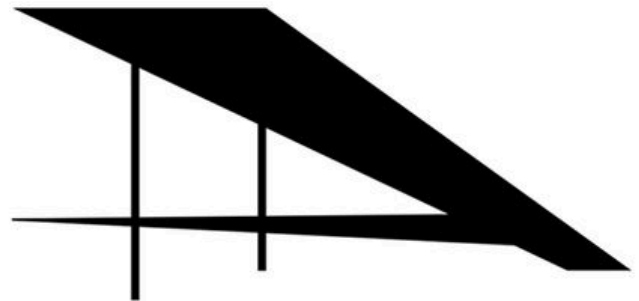

I offer very personalized service with an aim to make outdoor living spaces more aesthetic and functional, through design and construction. Many of my clients like to be involved in both the design process and hands on implementation. My client relationships are typically ongoing for the evolutionary process of a property, including new designs and restoration projects.

## Best thing you sell/serve/do?

I take my time to understand a client's vision to create the final, built, design solution.

## Something people don't realize about your business?

Given the opportunity, I can help design tiny homes and other non-conventional structures for living in.
