Sound Moves Marketing

Owner?

Wendy Durham

How long in business?

We have been helping businesses improve their online visibility for 15 years!

Primary business/service offered?

We help healthcare and service-based businesses get found online through website design, SEO, and thoughtful marketing strategies. We don't just build websites—we also create smart, personalized marketing solutions that bring in more of the right customers.

What makes your business special?

We're a small, dedicated team that offers highly personalized and supportive service to Southern Maine businesses and beyond. You're not just another client to us—we truly care about your success and take the time to create strategies that work for your unique business.

Best thing you sell/serve/do?

We design websites that not only look great but also get found. Plus, we drive more traffic to them, helping businesses attract more leads and customers.

Something people don't realize about your business/services?

A great-looking website is only part of the equation. If people can't find it, it's not doing much for your business. We focus on both design and strategy—making sure your online presence not only looks good but also supports your goals. You can see some of the results we've helped clients achieve in the success stories and case studies on our website.
