

# Yin-Yang Veterinary Care

## How long in business?

We will celebrate 1 year in March 2026!

## Primary business/service offered?

A veterinary practice treating a wide range of pets through in-home visits from Kittery to Norway.

## What makes your business special?

We offer in-home care, decreasing travel stress on pets. This is especially helpful for anxious pets and reptiles or other exotics which can be hard to transport safely.

## Best thing you sell/serve/do?

We treat a variety of animals from cats and dogs, to rabbits, lizards, and birds. This means, we also assist with the care of goats, pigs, turkeys and chickens. Dr. Brueckner brings years of experience and special training to the care of your exotic pets. We also offer education on husbandry and diets of these unique species, with the goal of preventing future diseases.

## Something people don't realize about your business/services?

While many people know that we can do examinations and vaccinations in the home, they don't tend to realize we can perform many medical diagnostics in the home, including blood work collection and minor ultrasounds.

An important piece of information that highlights who we are as an organization is that the name Yin-Yang Veterinary Care was a tribute to Dr. Brueckner's beloved dog of 10 years, Yin-Yang. He was the best boy and had such a wonderful spirit. Dr. Brueckner's love for Yin-Yang is mirrored in her care for her patients.
